

Fact Sheet: Fischer Development Recovery Road Program Repairs

City of New Orleans
Department of
Public Works

Project Summary:

The City of New Orleans will implement a multi-million dollar, multi-year comprehensive infrastructure improvement program to repair Hurricane Katrina related sub-surface and road damages. Types of repairs deemed eligible for improvement by FEMA include utilities, sidewalks, American with Disabilities Act compliant ramps, driveway aprons, curbs and road paving.

Project Facts:

Phase I: Between 2008-2009, the City of New Orleans performed citywide repairs to approximately 17,000 damage sites at an estimated cost of \$55.2 M. There were no Phase I repairs completed in the Fischer Development area.

Phase II: The Fischer Development Recovery Roads program will include multiple construction repair projects with a total estimated value that is approximately \$20,000. Design of the future road repairs is scheduled to begin in Summer 2013 and is being closely coordinated with the Sewerage and Water Board of New Orleans. In Fischer Development, construction is currently scheduled to begin in early 2017 and last through early 2018. Road resurfacing work will be limited in some areas of Fischer Development.

What to expect during construction:

Residents and businesses in Fischer Development area should exercise caution when driving, bicycling or walking near active construction sites. Residents can expect to experience temporary construction inconveniences such as limited access to areas within the construction zones, detours, movement of heavy equipment, safety signage and sounds.

In general, construction crews will be working from 7 a.m. to 5 p.m., Monday through Friday. The Fischer Development design team is Richard C Lambert Consulting Engineers. The construction contract is scheduled to be available for bid in late winter 2016.

Funding Facts:

Neighborhood Area	Status	Consultants	Total Estimated Repairs
Phase I Repairs	Completed	N/A	\$0
Phase II Repairs	Design	Richard C Lambert Consulting Engineers	\$20,000*
	Construction	TBD	
TOTAL Repairs — Fischer Development			\$20,000*

* FEMA inspectors will be working onsite with the City's design and construction contractor teams. During construction they are likely to identify additional storm damages that may be eligible for repair. In many cases it is likely the scope of work may be adjusted to include additional repairs.

Project Area:

- Thayer St.
- Westbank Expy
